

## MADS-TPDS - Tools and Programming Languages for Data Science

## MADS-TPDS - Tools and Programming Languages for Data Science

| General information                                   |  |
|---|--|
| <b>Module Code</b>                                    | MADS-TPDS  |
| <b>Unique Identifier</b>                              | ToolsProgLan-01-MA-M   |
| <b>Module Leader(s)</b>                               | Prof. Dr. Schwörer, Tillmann (tillmann.schworer@haw-kiel.de) |
| <b>Lecturer(s)</b>                                    | Prof. Dr. Schwörer, Tillmann (tillmann.schworer@haw-kiel.de) |
| <b>Offered in Semester</b>                            | Wintersemester 2026/27                                       |
| <b>Module duration</b>                                | 1 Semester   |
| <b>Occurrence frequency</b>                           | Regular  |
| <b>Module occurrence</b>                              | In der Regel jedes Semester                                  |
| <b>Language</b>                                       | Englisch   |
| <b>Recommended for international students</b>         | Yes  |
| <b>Can be attended with different study programme</b> | No   |

| Curricular relevance (according to examination regulations)                          |
|--|
| Study Subject: M.Sc. - DS - Data Science<br>Module type: Pflichtmodul<br>Semester: 1 |

| Qualification outcome   |
|---|
| <i>Areas of Competence: Knowledge and Understanding; Use, application and generation of knowledge; Communication and cooperation; Scientific self-understanding / professionalism.</i>  |
| Students know<br>- the foundations of the programming language Python<br>- standard workflow and corresponding programming processes in data science projects<br>- tools and practices that ensure reproducibility of results and reusability of code |
| Students are able to<br>- acquire, process, clean, analyse and visualize data<br>- prepare data for downstream data science tasks<br>- document and present their results and approach  |
| Students are able to<br>- communicate approach and results to technical and non-technical audiences<br>- work in teams on programming tasks using version control systems<br>- give and receive critique in a professional manner                     |
| Students are able to<br>- leverage relevant literature<br>- give and accept professional feedback   |

| <b>Content information</b> |  |
|----------------------------|--|
| <b>Content</b>             | 1. NumPy: Basic data handling with Numpy arrays<br>2. Pandas<br>- Data cleaning<br>- Exploratory data analysis<br>3. Data Input/Output<br>- APIs<br>- SQL databases<br>- Web scraping<br>4. Version Control with Git and GitHub<br>5. Advanced Python  |
| <b>Literature</b>          | - Lecture Materials<br>- VanderPlas: A Whirlwind Tour of Python. O'Reilly, first edition. Available online: <a href="https://jakevdp.github.io/WhirlwindTourOfPython/">https://jakevdp.github.io/WhirlwindTourOfPython/</a><br>- VanderPlas: Python Data Science Handbook. O'Reilly, first edition. Available online: <a href="https://jakevdp.github.io/PythonDataScienceHandbook">https://jakevdp.github.io/PythonDataScienceHandbook</a> .<br>- McKinney: Python for Data Analysis: Data Wrangling with Pandas, NumPy, and IPython. O'Reilly, second edition. |

| <b>Teaching formats of the courses</b> |            |
|--|------------|
| <b>Teaching format</b>                 | <b>SWS</b> |
| Lehrvortrag + Übung                    | 4          |

| <b>Workload</b>      |              |
|----------------------|--------------|
| <b>Number of SWS</b> | 4 SWS        |
| <b>Credits</b>       | 5,00 Credits |
| <b>Contact hours</b> | 48 Hours     |
| <b>Self study</b>    | 102 Hours    |

| <b>Module Examination</b>                                      |  |
|--|--|
| <b>Examination prerequisites according to exam regulations</b> | None   |
| <b>MADS-TPDS - Portfolioprüfung</b>                            | Method of Examination: Portfolioprüfung<br>Weighting: 100%<br>wird angerechnet gem. § 11 Absatz 2 PVO: No<br>Graded: Yes |

| <b>Miscellaneous</b>             |   |
|----------------------------------|---|
| <b>Recommended Prerequisites</b> | Basic Python programming skills are recommended. Students with little or no Python programming skills are strongly advised to participate at the Pre-Course Programming, taking place in the week prior to the start of the regular programming course. |
